

Alameda Ornamental Iron

Window Guards

Bedrooms must have TWO different means of escape in case of a fire. We manufacture and install fire escape window guards that have a security release on them, allowing the guard to unlock from the inside at the push of a button. They cannot be opened from the outside, so they will keep you and your family safe from intruders.

Fire Escape window guards for bedroom windows

Standard window guard

Window guards add protection and beauty to your home. We custom manufacture all guards to the size of your windows. You can choose from several different styles of decorative castings to compliment your home. Standard paint colors are black, white, and bronze. Of course, custom colors are always available at an additional charge.
